

## More WIFI = More learning

Delighted to share that we've been featured in the **Toggle Summer Digital Journal**.

**Cable AML** believes that connecting devices with quality broadband enables students to access educational materials, communicate with their peers, and participate in online activities regardless of their location. Additionally, **private cellular networks** can be used to augment coverage in areas on and off campus where traditional Wi-Fi coverage or internet connection may be inadequate, allowing for improved access to online resources and communication tools.

...Project WISH (the acronym for Wireless Service at Home) is a public-private initiative where Collins and his team are working with Lynchburg's municipal IT department to add 4G radios provided by Cable AML and CDWG to towers and other infrastructure...
