

Cable AML Completes First Call Milestone for Malcel in Malawi, Paving the Way for 4G/5G Deployment

Cable AML is pleased to announce a significant achievement in its partnership with Malcel: the successful completion of the First Call over a newly deployed 4G/5G network in Malawi. This milestone demonstrates the system's readiness for full-scale rollout and marks a key step forward in enhancing the country's mobile connectivity.

The First Call was completed using a 4G/5G base station in Band 41, integrated with a full CORE and IMS solution provided by Cable AML. The network supported voice calls using mobile numbers officially allocated by the Malawi Communications Regulatory Authority (MACRA). Representatives from MACRA were present to witness and test the system, successfully making live calls within the network. The voice quality was commended for its clarity and performance, with MACRA noting it as significantly better than existing services in the market.

"This is a proud moment for the Cable AML team," said Sunil Naik, CEO / President, Cable AML. "The successful First Call validates the strength of our technology and our commitment to supporting Malcel in delivering next-generation mobile services in Malawi."

Cable AML remains committed to working closely with Malcel and MACRA to execute the full project as proposed, aiming to bring high-quality, high-speed mobile connectivity to communities across Malawi.

About Cable AML.

Cable AML is a global leader in advanced wireless broadband and telecommunications systems, specializing in turnkey solutions for microwave, LTE, and 5G networks. Wish to thank Malcel CEO, Mr. B Ndawala (Bond), for this opportunity and for being able to offer services in a timeline not achieved by other larger organizations.
